Hunting provides products and services to the world’s leading national, international energy companies and oil service companies enabling the extraction of oil and gas. Manufacturing and sales locations are located in the key energy producing regions of the world.

Proprietary Technology
Hunting owns and develops proprietary patented products with a wide range of applications below the wellhead to drilling mud motors, premium connections, Well perforating, Klogging and intervention tools.

Geographic Footprint
It is strategic locations around the world. Hunting owns and operates plants, properties and equipment employing people to serve its global customers with local services and products.

Health, Safety, Environment and Quality Assurance
Hunting is committed to working safely in an environmentally responsible manner. These principles are fully integrated within our Quality Management System that defines the company’s global operations.

Quality Assurance
It is essential that products and services provided by Hunting are designed and manufactured to conform to the agreed API, proprietary licensors, or other specification of the customer meeting their needs and expectations the first time, every time.

It is the policy of Hunting that only the highest quality products and services, that meet all specification requirements, are provided to customers. Hunting operates a corporate Quality Management System covering all worldwide locations.

Health, Safety and the Environment
Hunting is committed to achieving and maintaining the highest standards of safety for its employees, customers, suppliers and the public. Hunting business units consciously operate in a manner that includes environmental matters as an integral part of its business plan.

Hunting’s aims are no accidents, no harm to people, and no damage to the environment.

The Hunting goal is “Total Customer Satisfaction.”

Field Service

Hunting provides products and services to the world’s leading national, international energy companies and oil service companies enabling the extraction of oil and gas. Manufacturing and sales locations are located in the key energy producing regions of the world.
OCTG Supply

Hunting can provide cost effective solutions for any OCTG requirement or well programme worldwide by combining the provision of tubulars, threaded accessories and logistics support.

**Key Principles**

Using experience gained from working with operators and turnkey drilling companies over the last thirty years, Hunting’s OCTG business model has been expanded to capitalise on the rapidly developing Chinese mill supply.

**Managing Quality**

Hunting recognises the importance of effective quality regimes to ensure service consistency.

With this in mind, Hunting has resident mill quality engineers on-site 24/7 to ensure quality control in every production run.

This is supplemented by standardised quality plans to ensure technical specifications and conditions are met in a safe and timely manner.

Fisons hunting utilise metallographic verifying production samples to final inspection receive including preparation for shipping. Hunting ensures consistently high levels of quality OCTG at very competitive price levels.

**Field Service**

Hunting’s quality control does not end with the delivered product at the dispatch point – Hunting Field Service Engineers can assist with the final installation of tubulars on the wellsite, ensuring the integrity of the pipe and connection properties.

**Threading Support**

Hunting has three large threading facilities in the Asia Pacific region to provide threading support for tubulars up to 20 inch diameter for all major threadforms, pipe joint, coupling, crossover and OEM accessory manufacture and repair.

- **Wuxi, China** has capacity to thread over 100,000 metric tonnes of Hunting SEAL-LOCK® product per year from a production footprint of 22,000m².
- **Batam, Indonesia** can offer 60,000 metric tonnes of Hunting SEAL-LOCK® product per year from a production footprint of 5800m².
- **Hunting’s Singapore facility** can deliver threaded accessories, full-length threading with Hunting SEAL-LOCK® and other licensed connections.

All Hunting facilities are approved by American Petroleum Institute Quality Registrar to ISO 9001, ISO/TS 29001 and relevant API certification. These locations are supported by Hunting SEAL-LOCK® licensees in Doha, Australia, China, India, Indonesia, Japan, Malaysia, Singapore, Thailand.

In addition to casing and tubing supply, Hunting can offer proprietary connection threadforms, dope-free technology, thread storage compounds, protectors and thread sealant.

**Hunting SEAL-LOCK® Proprietary Connections**

Hunting is a world leader in developing premium connection solutions to meet the ever increasing demands of the world’s oil and gas industry.

Fisons are premium to fully gasket flush to thread & coupled, enhanced compression resistance to high torque, and proven to provide a proprietary connection for every demand or well application.

Hunting has created strategic alliances with Baoshan Iron & Steel Co, Hengyang Valin Steel Tube and Tianjin Pipe Group to ensure the consistent supply of quality OCTG. From high pressure high temperature wells to sour gas applications, Hunting can offer the complete range of sizes and grades to suit every purpose.

**Tianjin Pipe Group**

Largest OCTG producer in China, with the capacity to produce 3,500,000 tons of quality seamless pipes per year, including casing, tubing, line pipe and other tubular products.

**Baoshan Iron & Steel Co**

4th largest steel producer in the world measured by OCTG output with an annual output of around 17,000,000 tonnes.

**Hengyang Valin Steel Tube**

7th largest steel tube and pipe manufacturers in the world with an annual OCTG output of 2,800,000 tonnes.
